SATA E-Newsletter

Provided bilingual editorial support for the June, July, and August e-newsletters

OAS|CICAD

SATA e-Newsletter Vol.29

June, 2026

SATA

The Inter-American Observatory on Drugs (OID), of the Inter-American Drug Abuse Control Commission (CICAD), of the Organization of American States (OAS) manages and coordinates the Early Warning System of the Americas (SATA) within the framework of the Hemispheric Drug Strategy 2020 and its Plan of Action.

The SATA operates as a clearinghouse and dissemination platform for information on emerging drug threats, fueled by alerts issued by national early warning systems (EWS). It also fosters international and horizontal cooperation in drug monitoring and response efforts.

For more information on new and emerging drugs in the Americas, visit: <https://www.oas.org/ext/en/security/early-warnings-system>

SATA

Early Warning System of the Americas
Summary of Emerging Drug Alerts and Information in May 2026

1. ADULTERANTS
2. MDMA and THC
3. "TUCI"
4. TETRAHYDROCANNABIPHOROL (THCP)
5. MEDETOMIDINE
6. MITRAGYNINE DERIVATIVES and KRATOM BYPRODUCTS
7. CRYSTAL METH
8. MDMA
9. TETRAHYDROCANNABIPHOROL (THCP)

Early Warning System of the Americas
Summary of Emerging Drug Alerts and Information in June 2026

1. LOCAL TRENDS WITH KETAMINE AND NPS KETAMINE ANALOGS
2. MDMA
3. KETAMINE
4. BENZIMIDAZOL-2-ONES "ORPHINES"
5. EXTREME HEAT INCREASES RISKS OF OVERDOSE
6. NEW PSYCHOACTIVE SUBSTANCES
7. FENTANYL PRECURSORS
8. 1,4-BUTANEDIOL
9. BLOTTER PAPER INFUSED WITH VARIOUS SUBSTANCES

OID Drug Alert Infographic

- Processed and structured regional drug alert data in Excel to identify key substance trends and geographical distributions across eight countries (Nov 2025-June 2026)
- Translated Excel findings into a comprehensive OID infographic detailing 53 reported alerts

Frecuencia de detección de sustancias

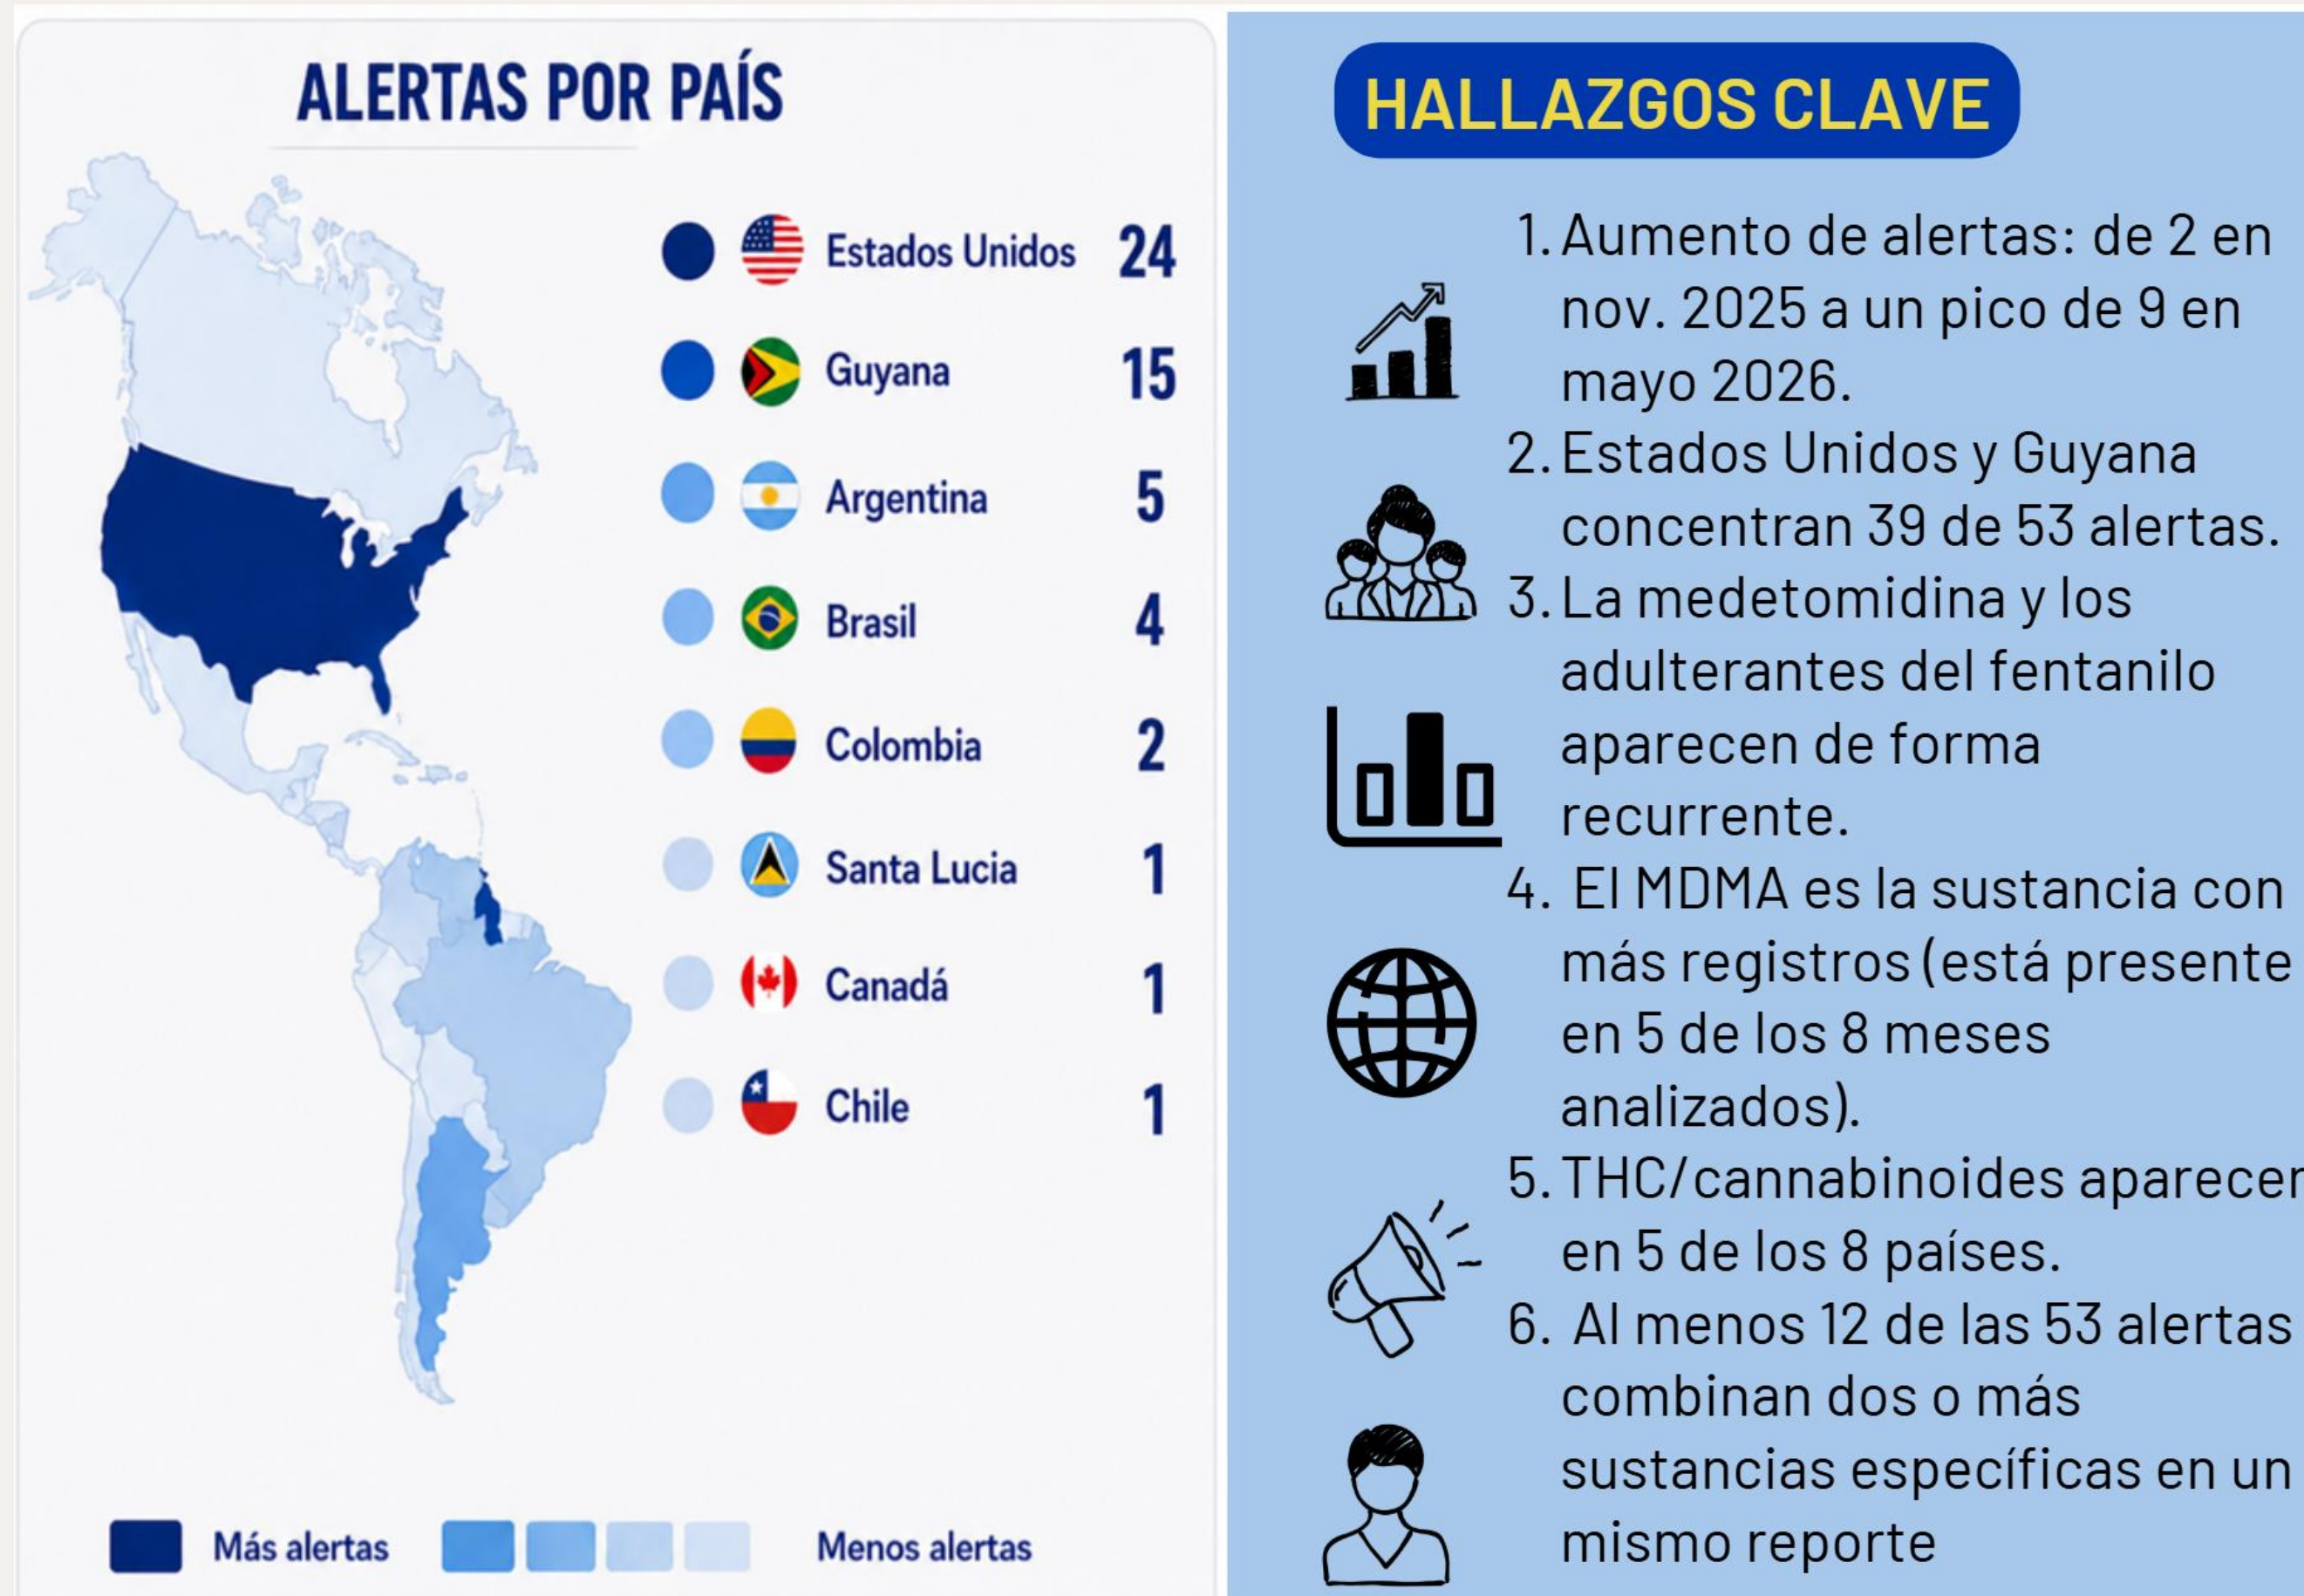

ALERTAS POR CATEGORÍA DE SUSTANCIA NOVIEMBRE 2025 - JUNIO 2026

OID Drug Alert Infographic

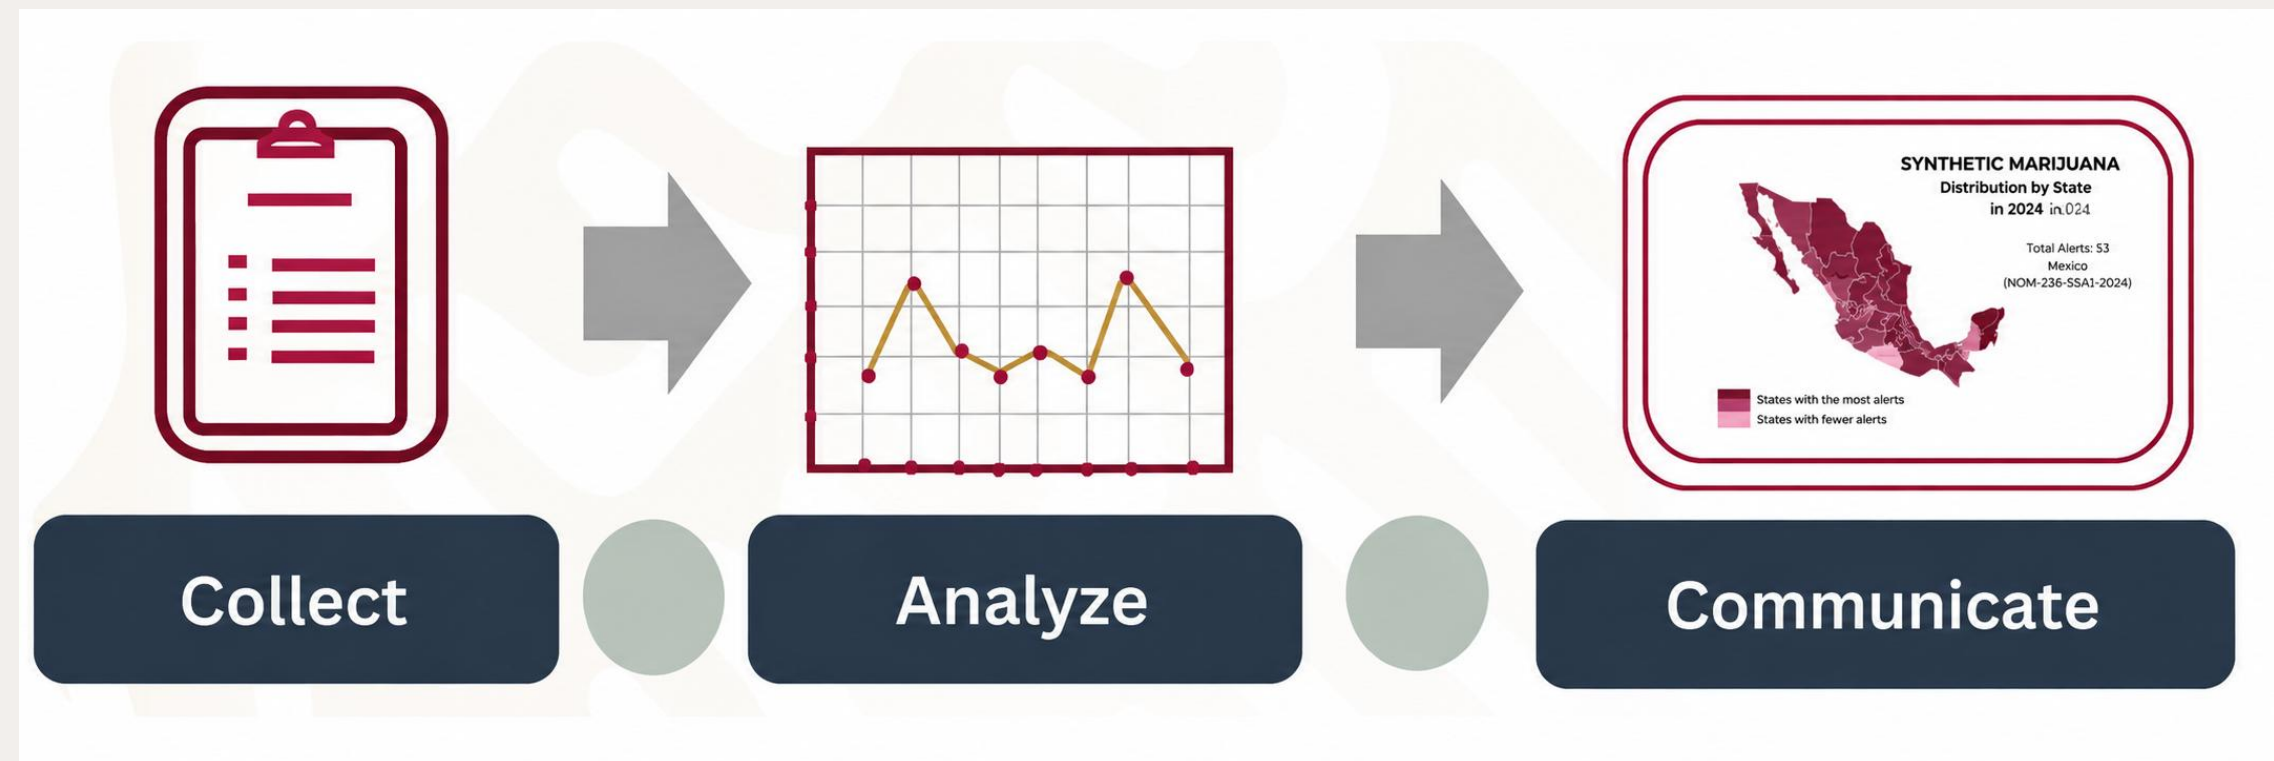

KEY FINDINGS

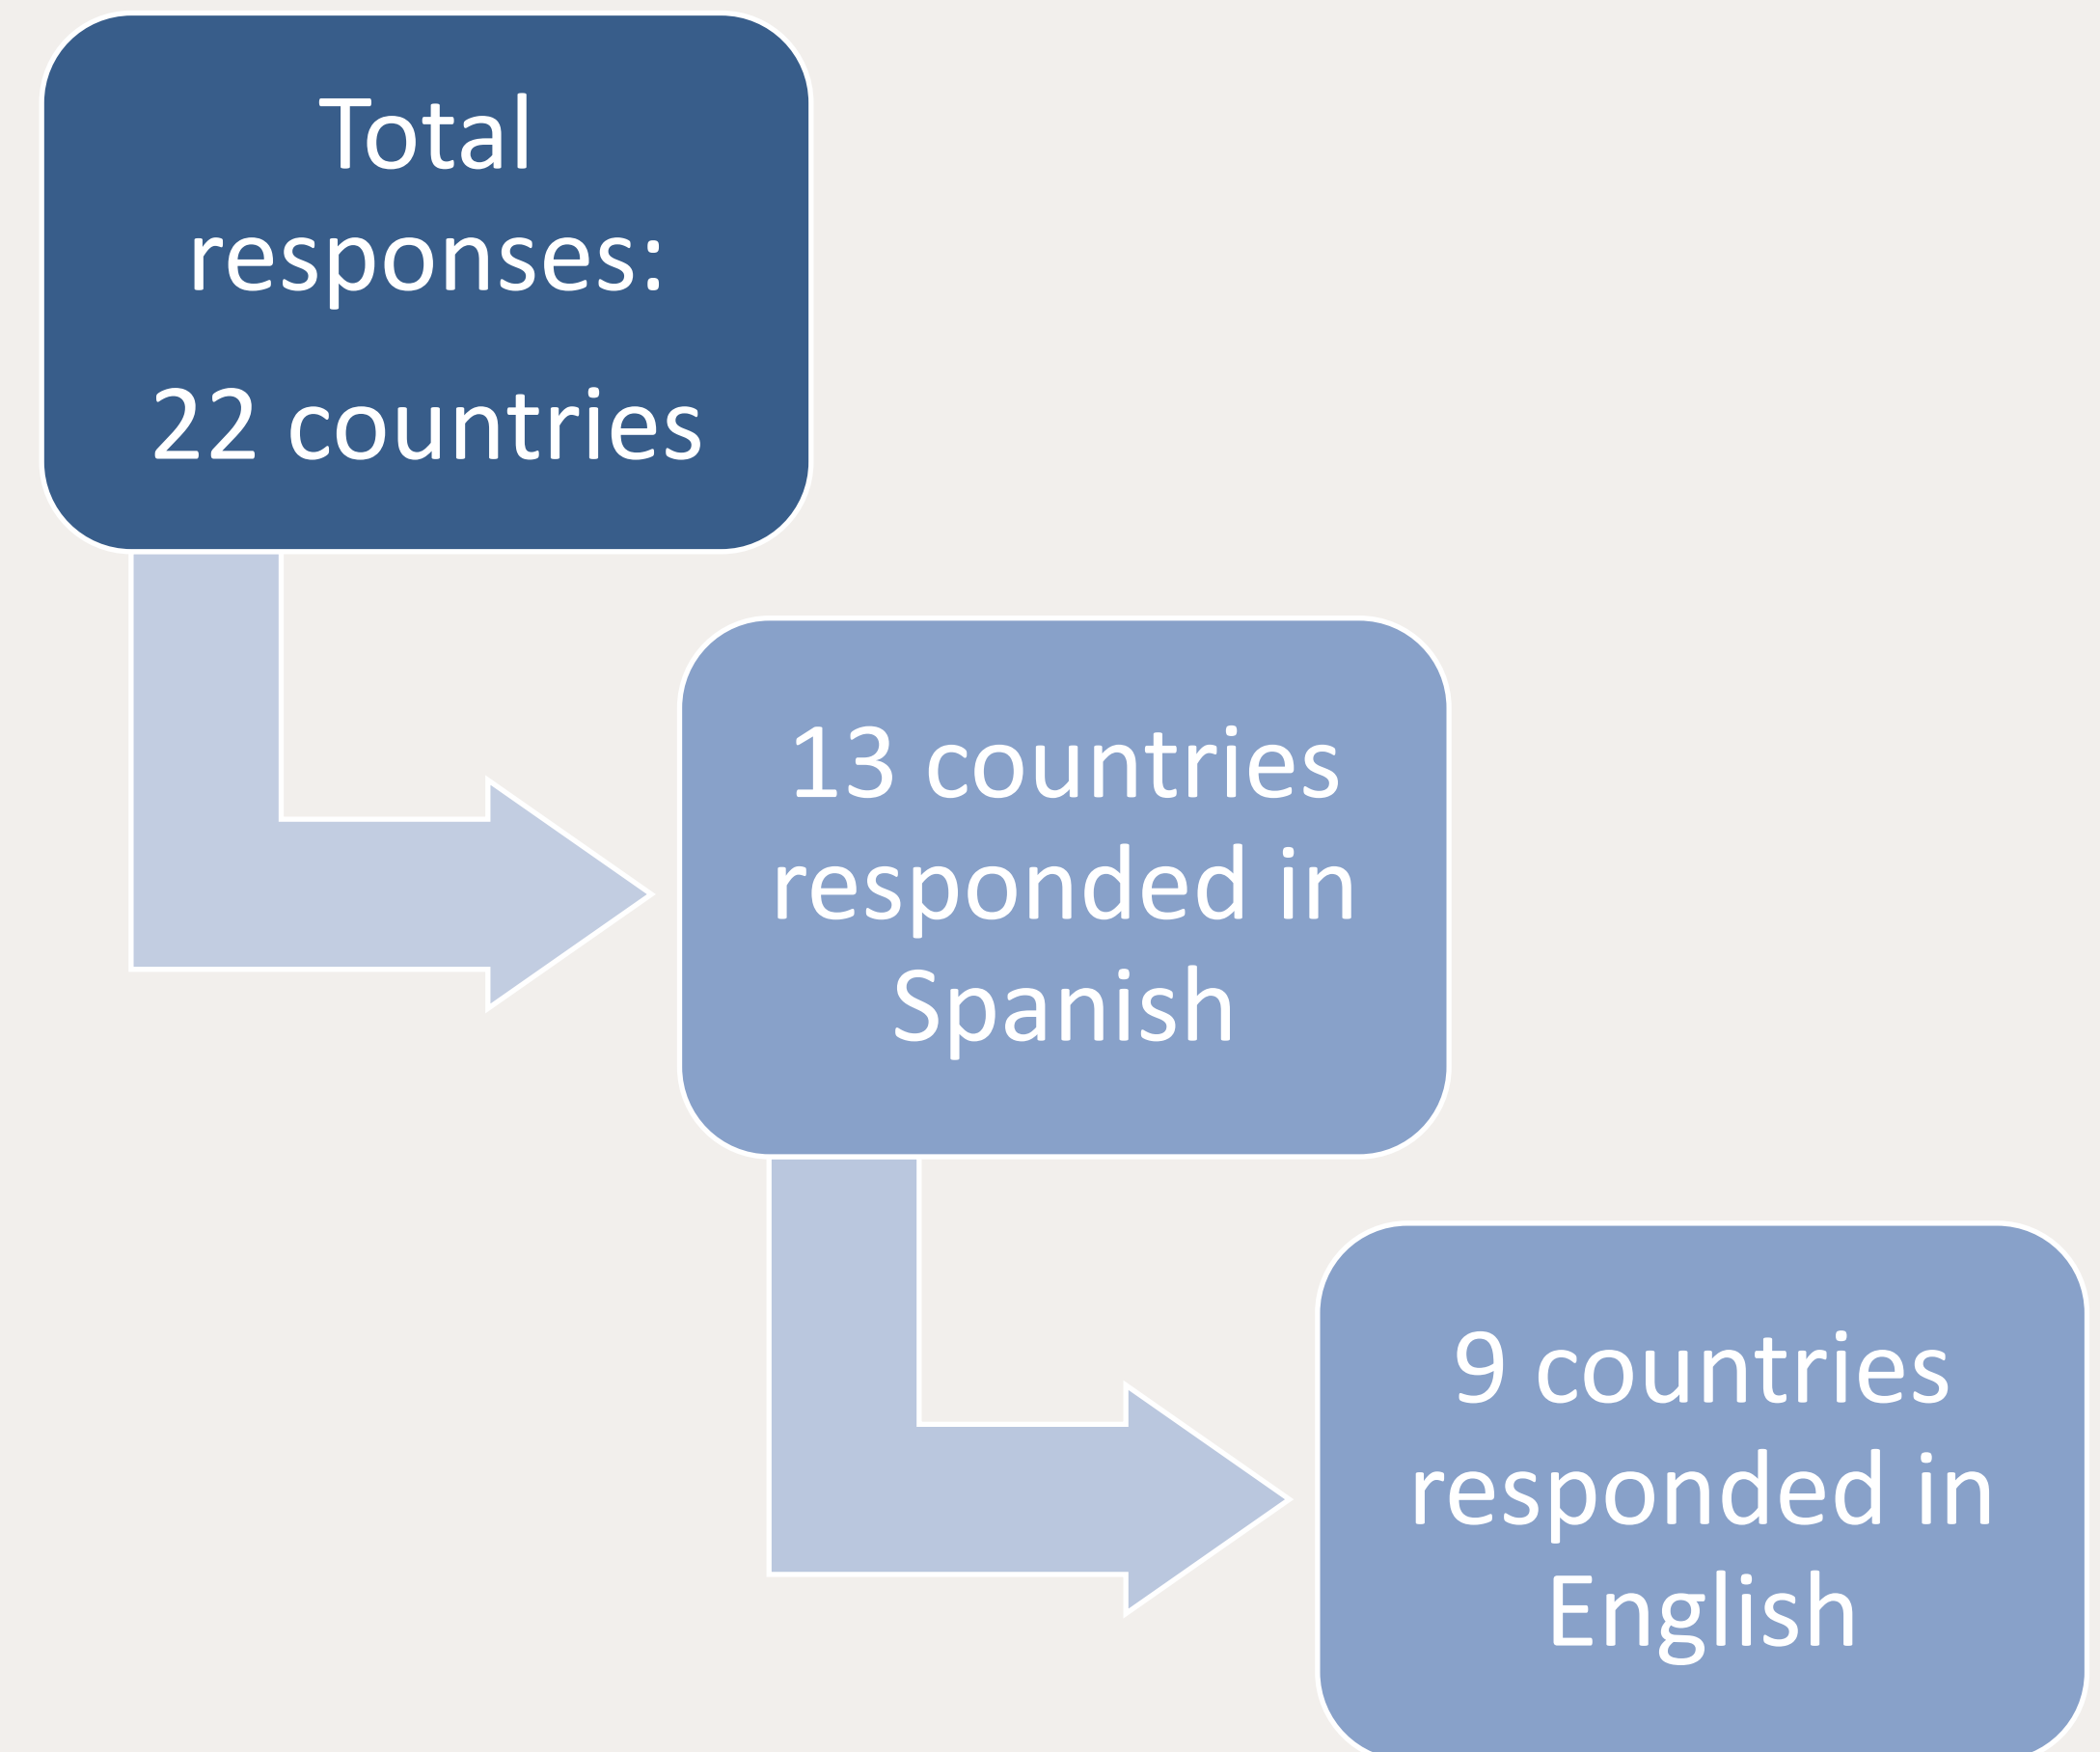

- Increase in alerts: from 2 in November 2025 to a peak of 9 in May 2026.
- The United States and Guyana account for 39 of the 53 alerts.
- Medetomidine and fentanyl adulterants appear recurrently.
- MDMA is the substance with the most records, appearing in 5 of the 8 months analyzed.
- THC/cannabinoids appear in 5 of the 8 countries.
- At least 12 of the 53 alerts involve two or more specific substances reported in the same alert.

Brief-Questionnaire: E-Cigarettes, vaping, and Drug Use on Survey Monkey

- Co-designed and analyzed a cost-effective, bilingual Survey Monkey questionnaire on vaping use, engaging 22 member states.
- Evaluated data metrics in Excel to assess regional trends and enhance member state engagement, while maintaining a low-cost, scalable survey model.

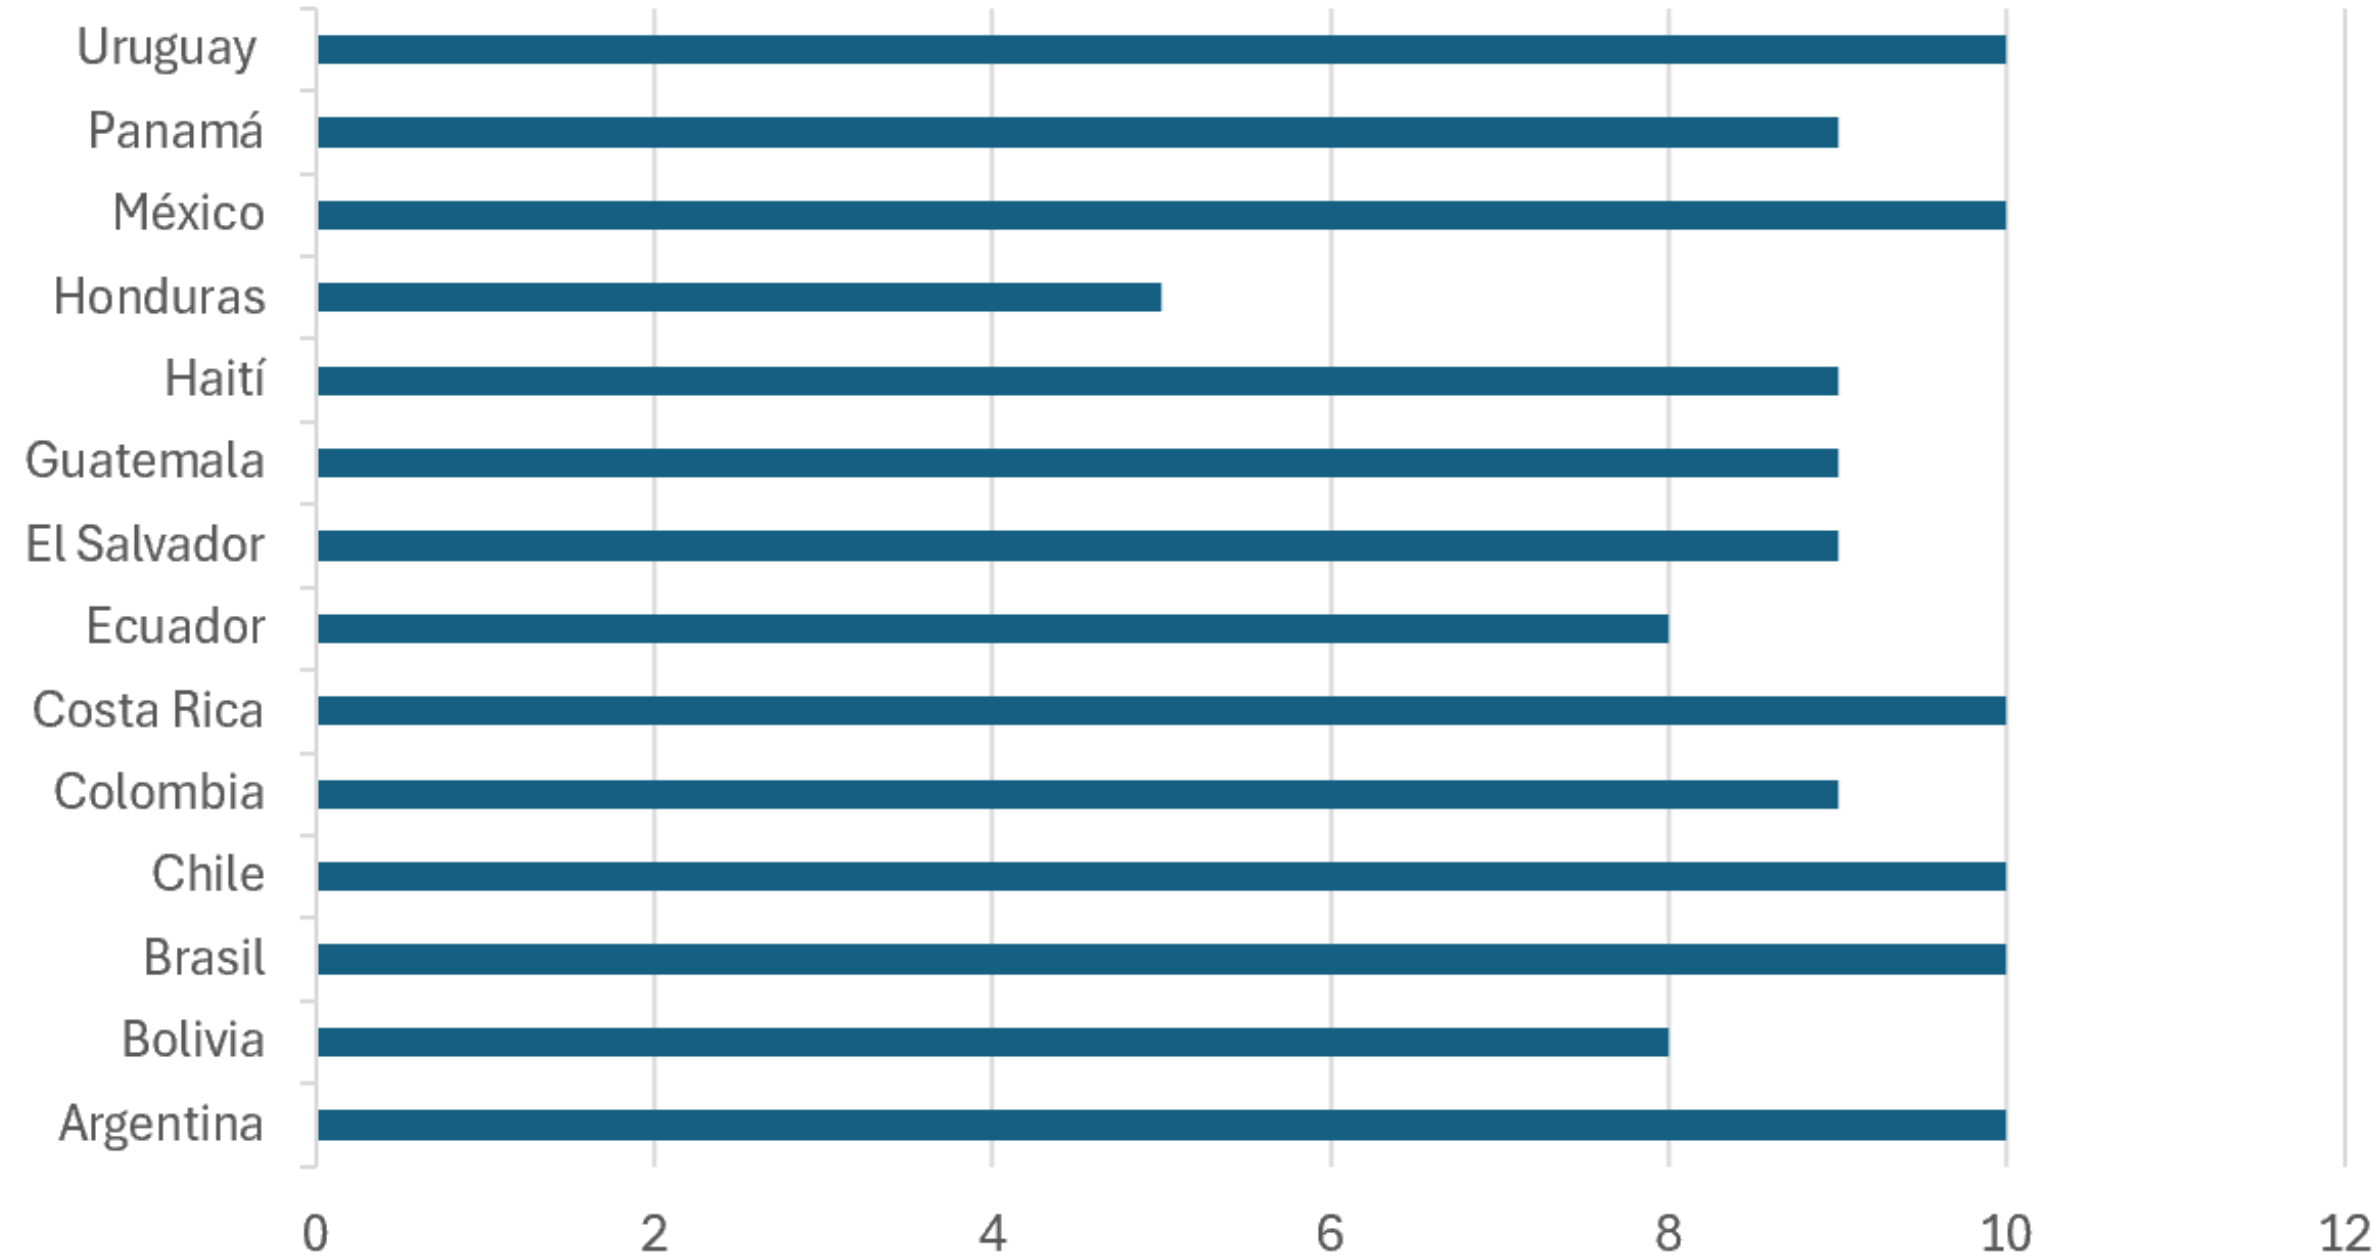

*Haiti responded twice; once in English and once in Spanish

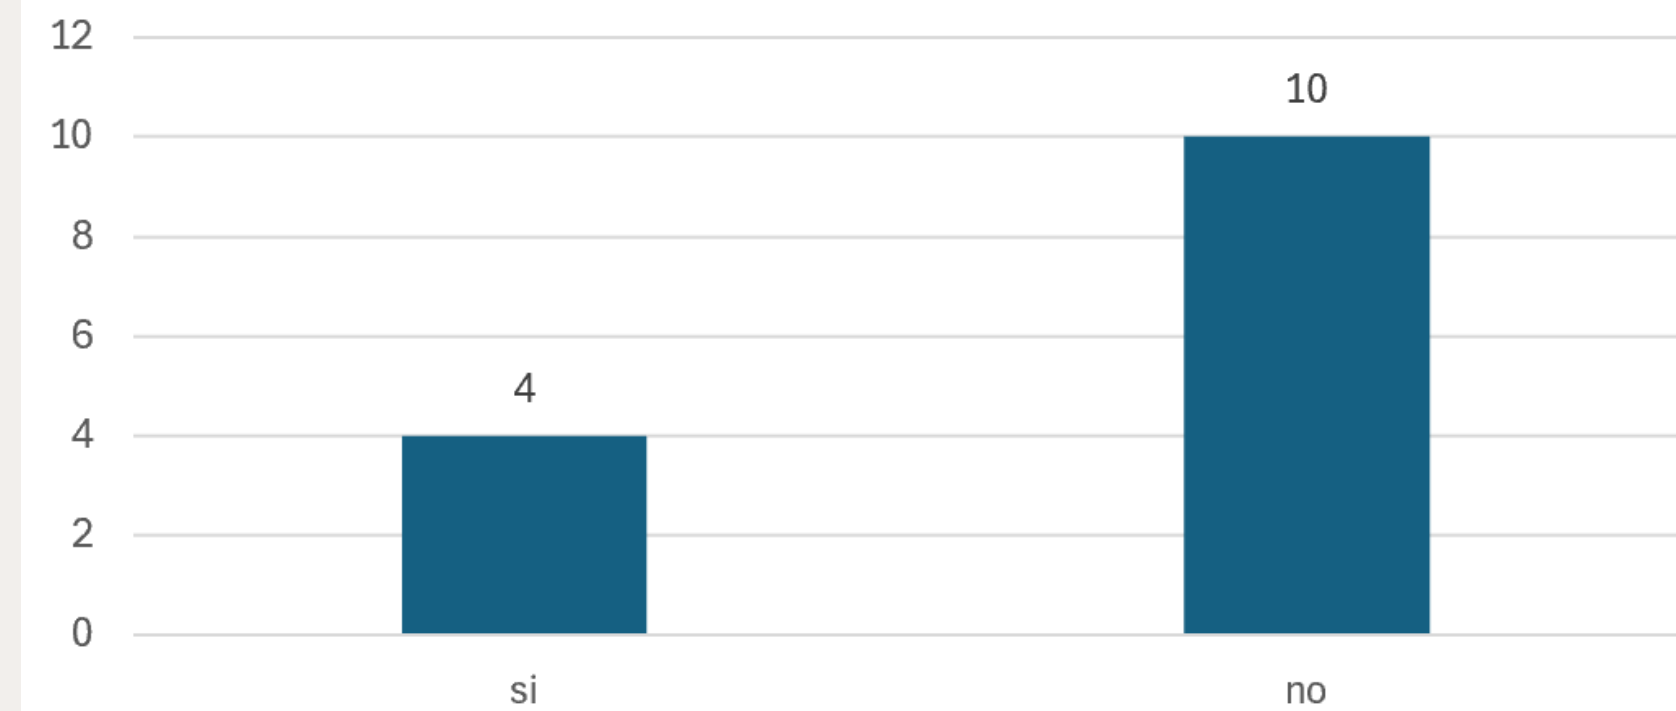

Brief-Questionnaire: E-Cigarettes, vaping, and Drug Use on Survey Monkey

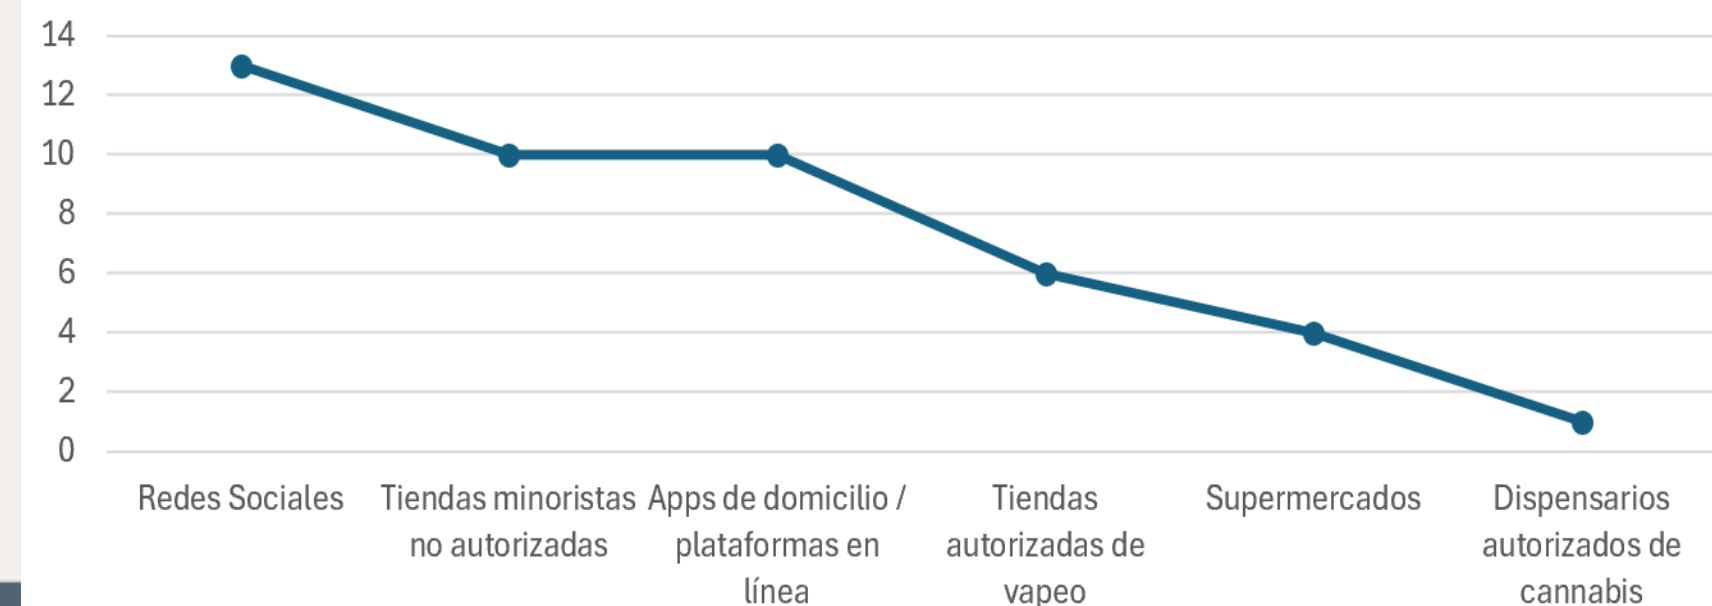

Prioridad nacional de regular vapeadores

¿Cuántos países cuentan con un Sistema de Alerta Temprana sobre Drogas (SAT)?

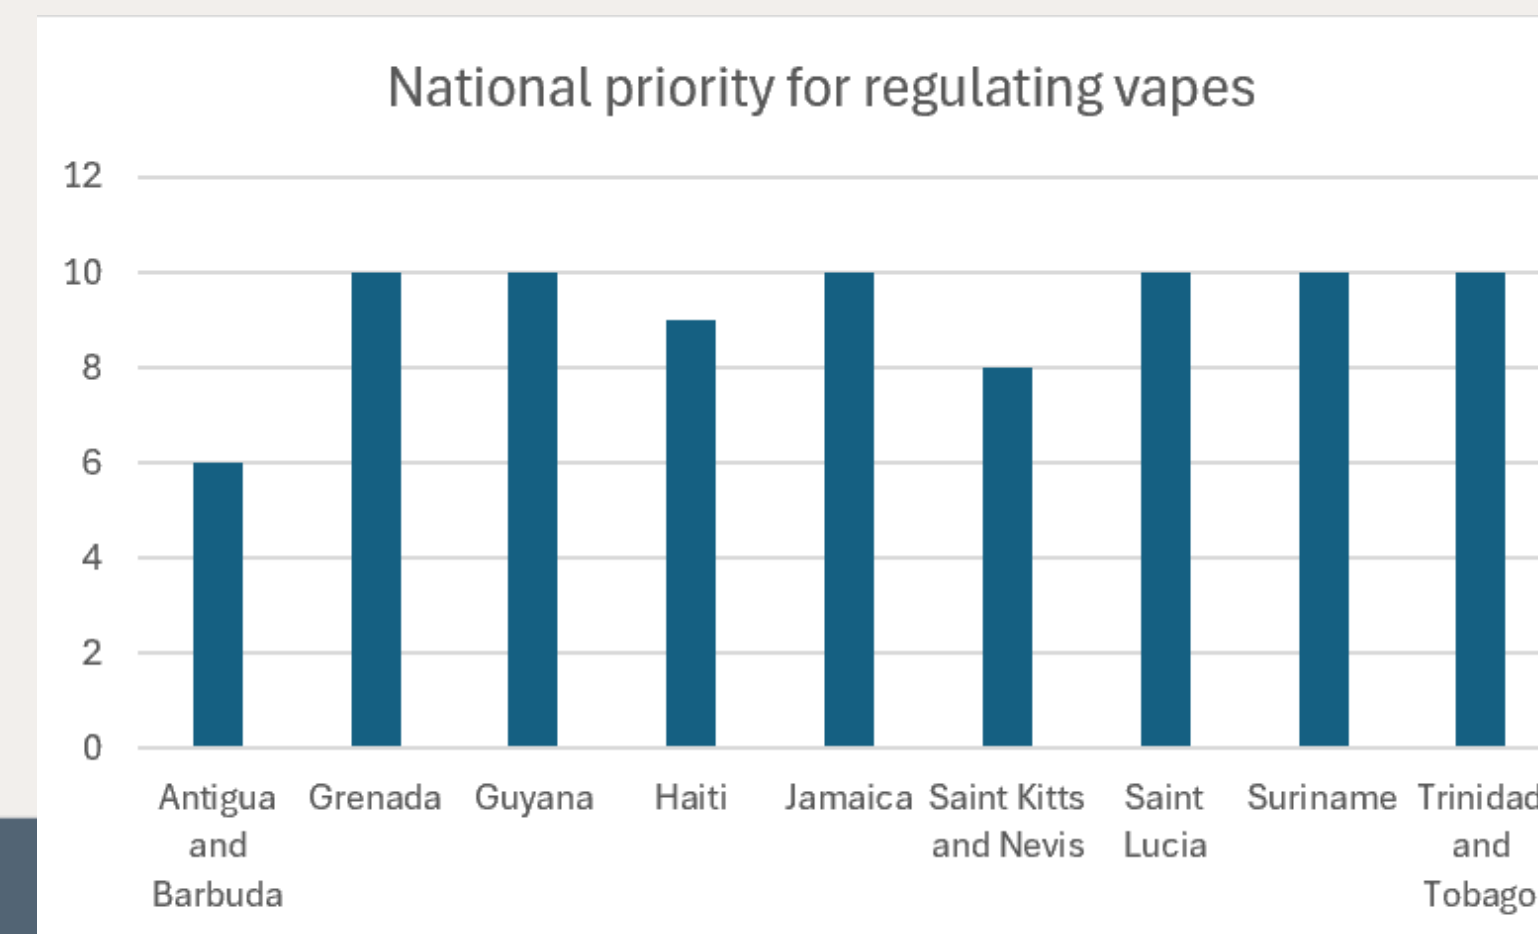

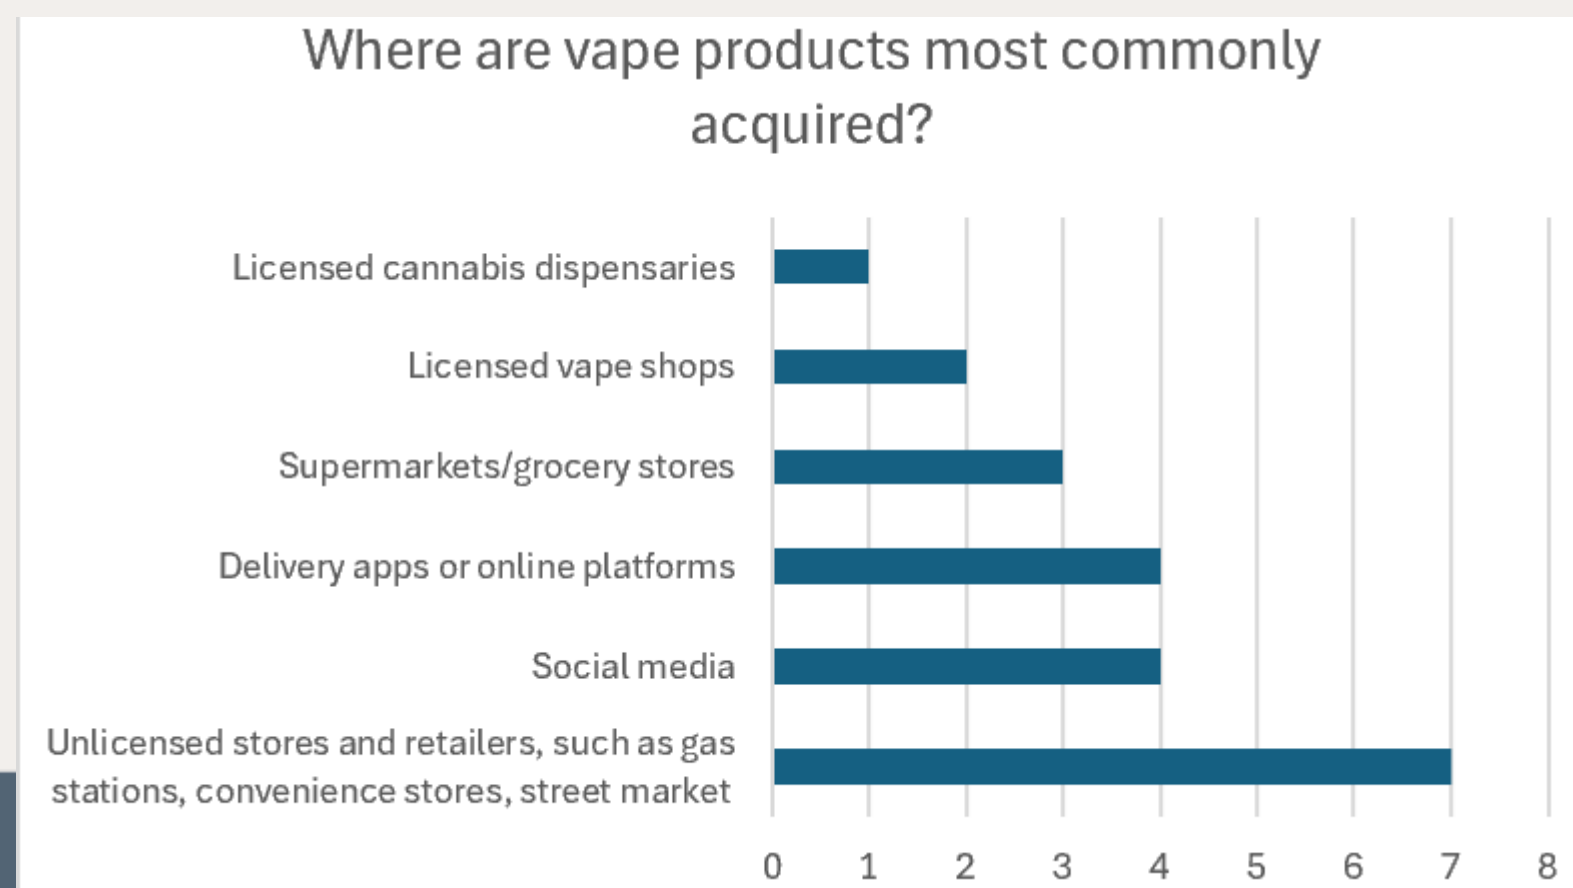

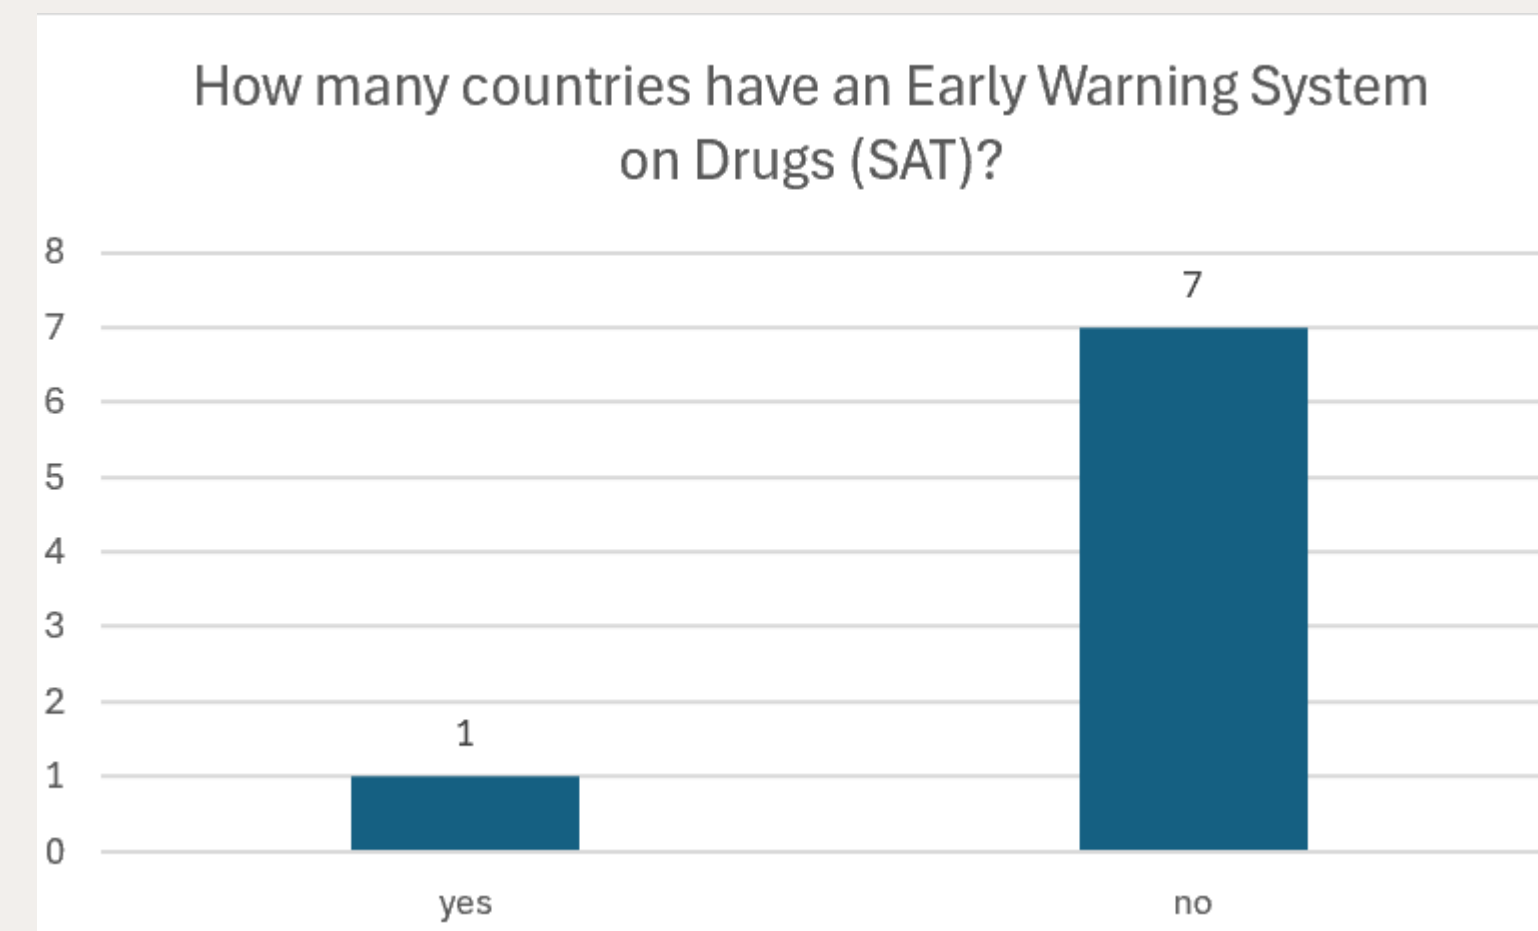

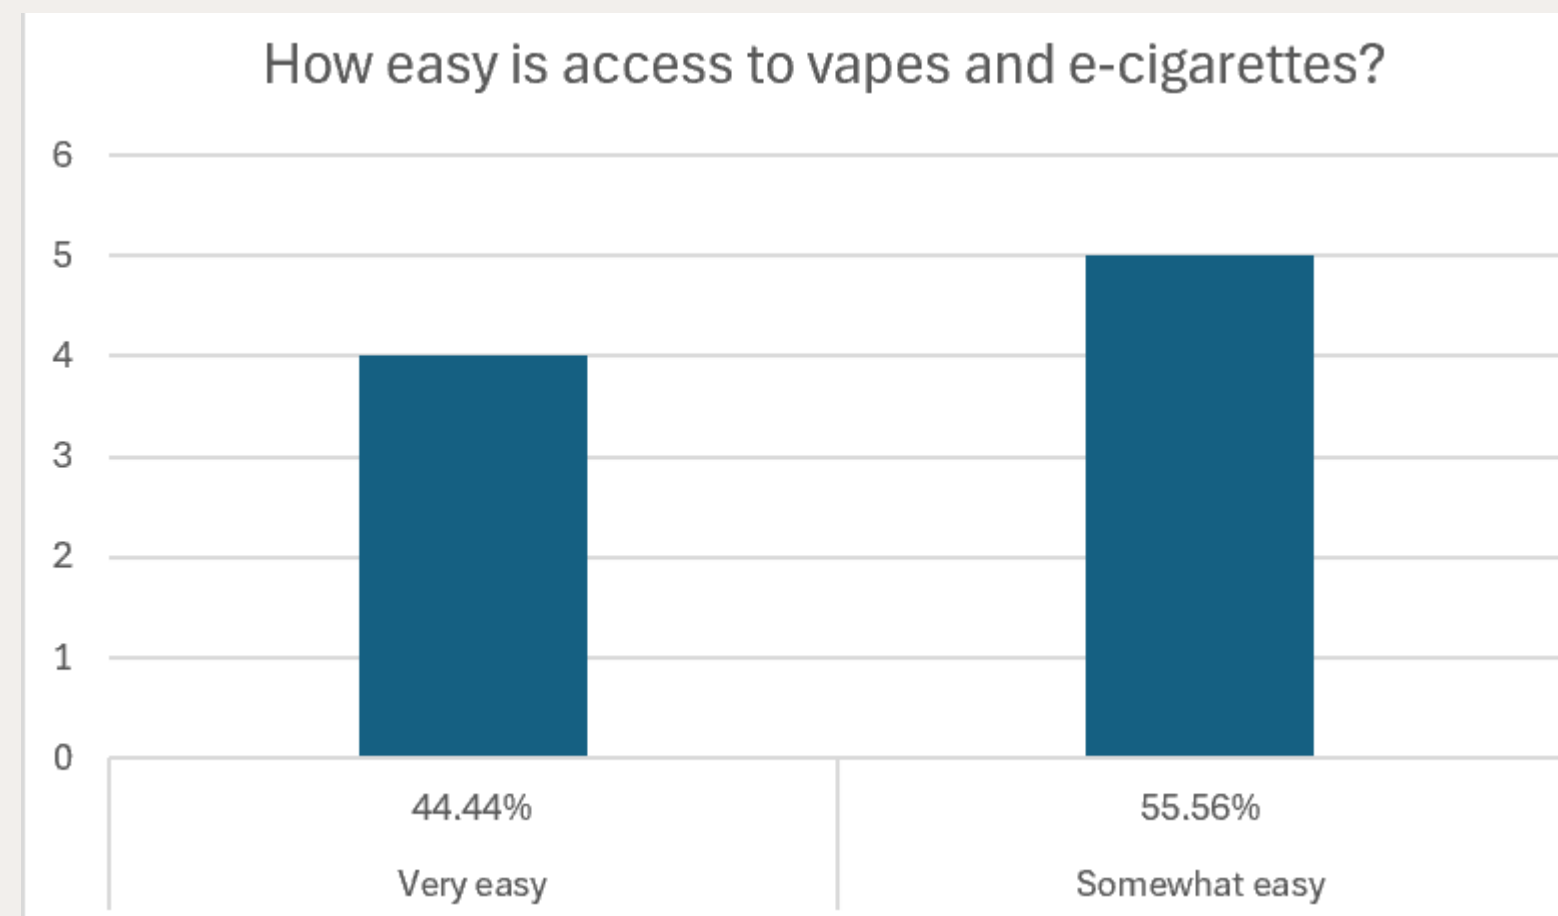

¿Dónde se adquieren con mayor frecuencia los productos de vapeo?

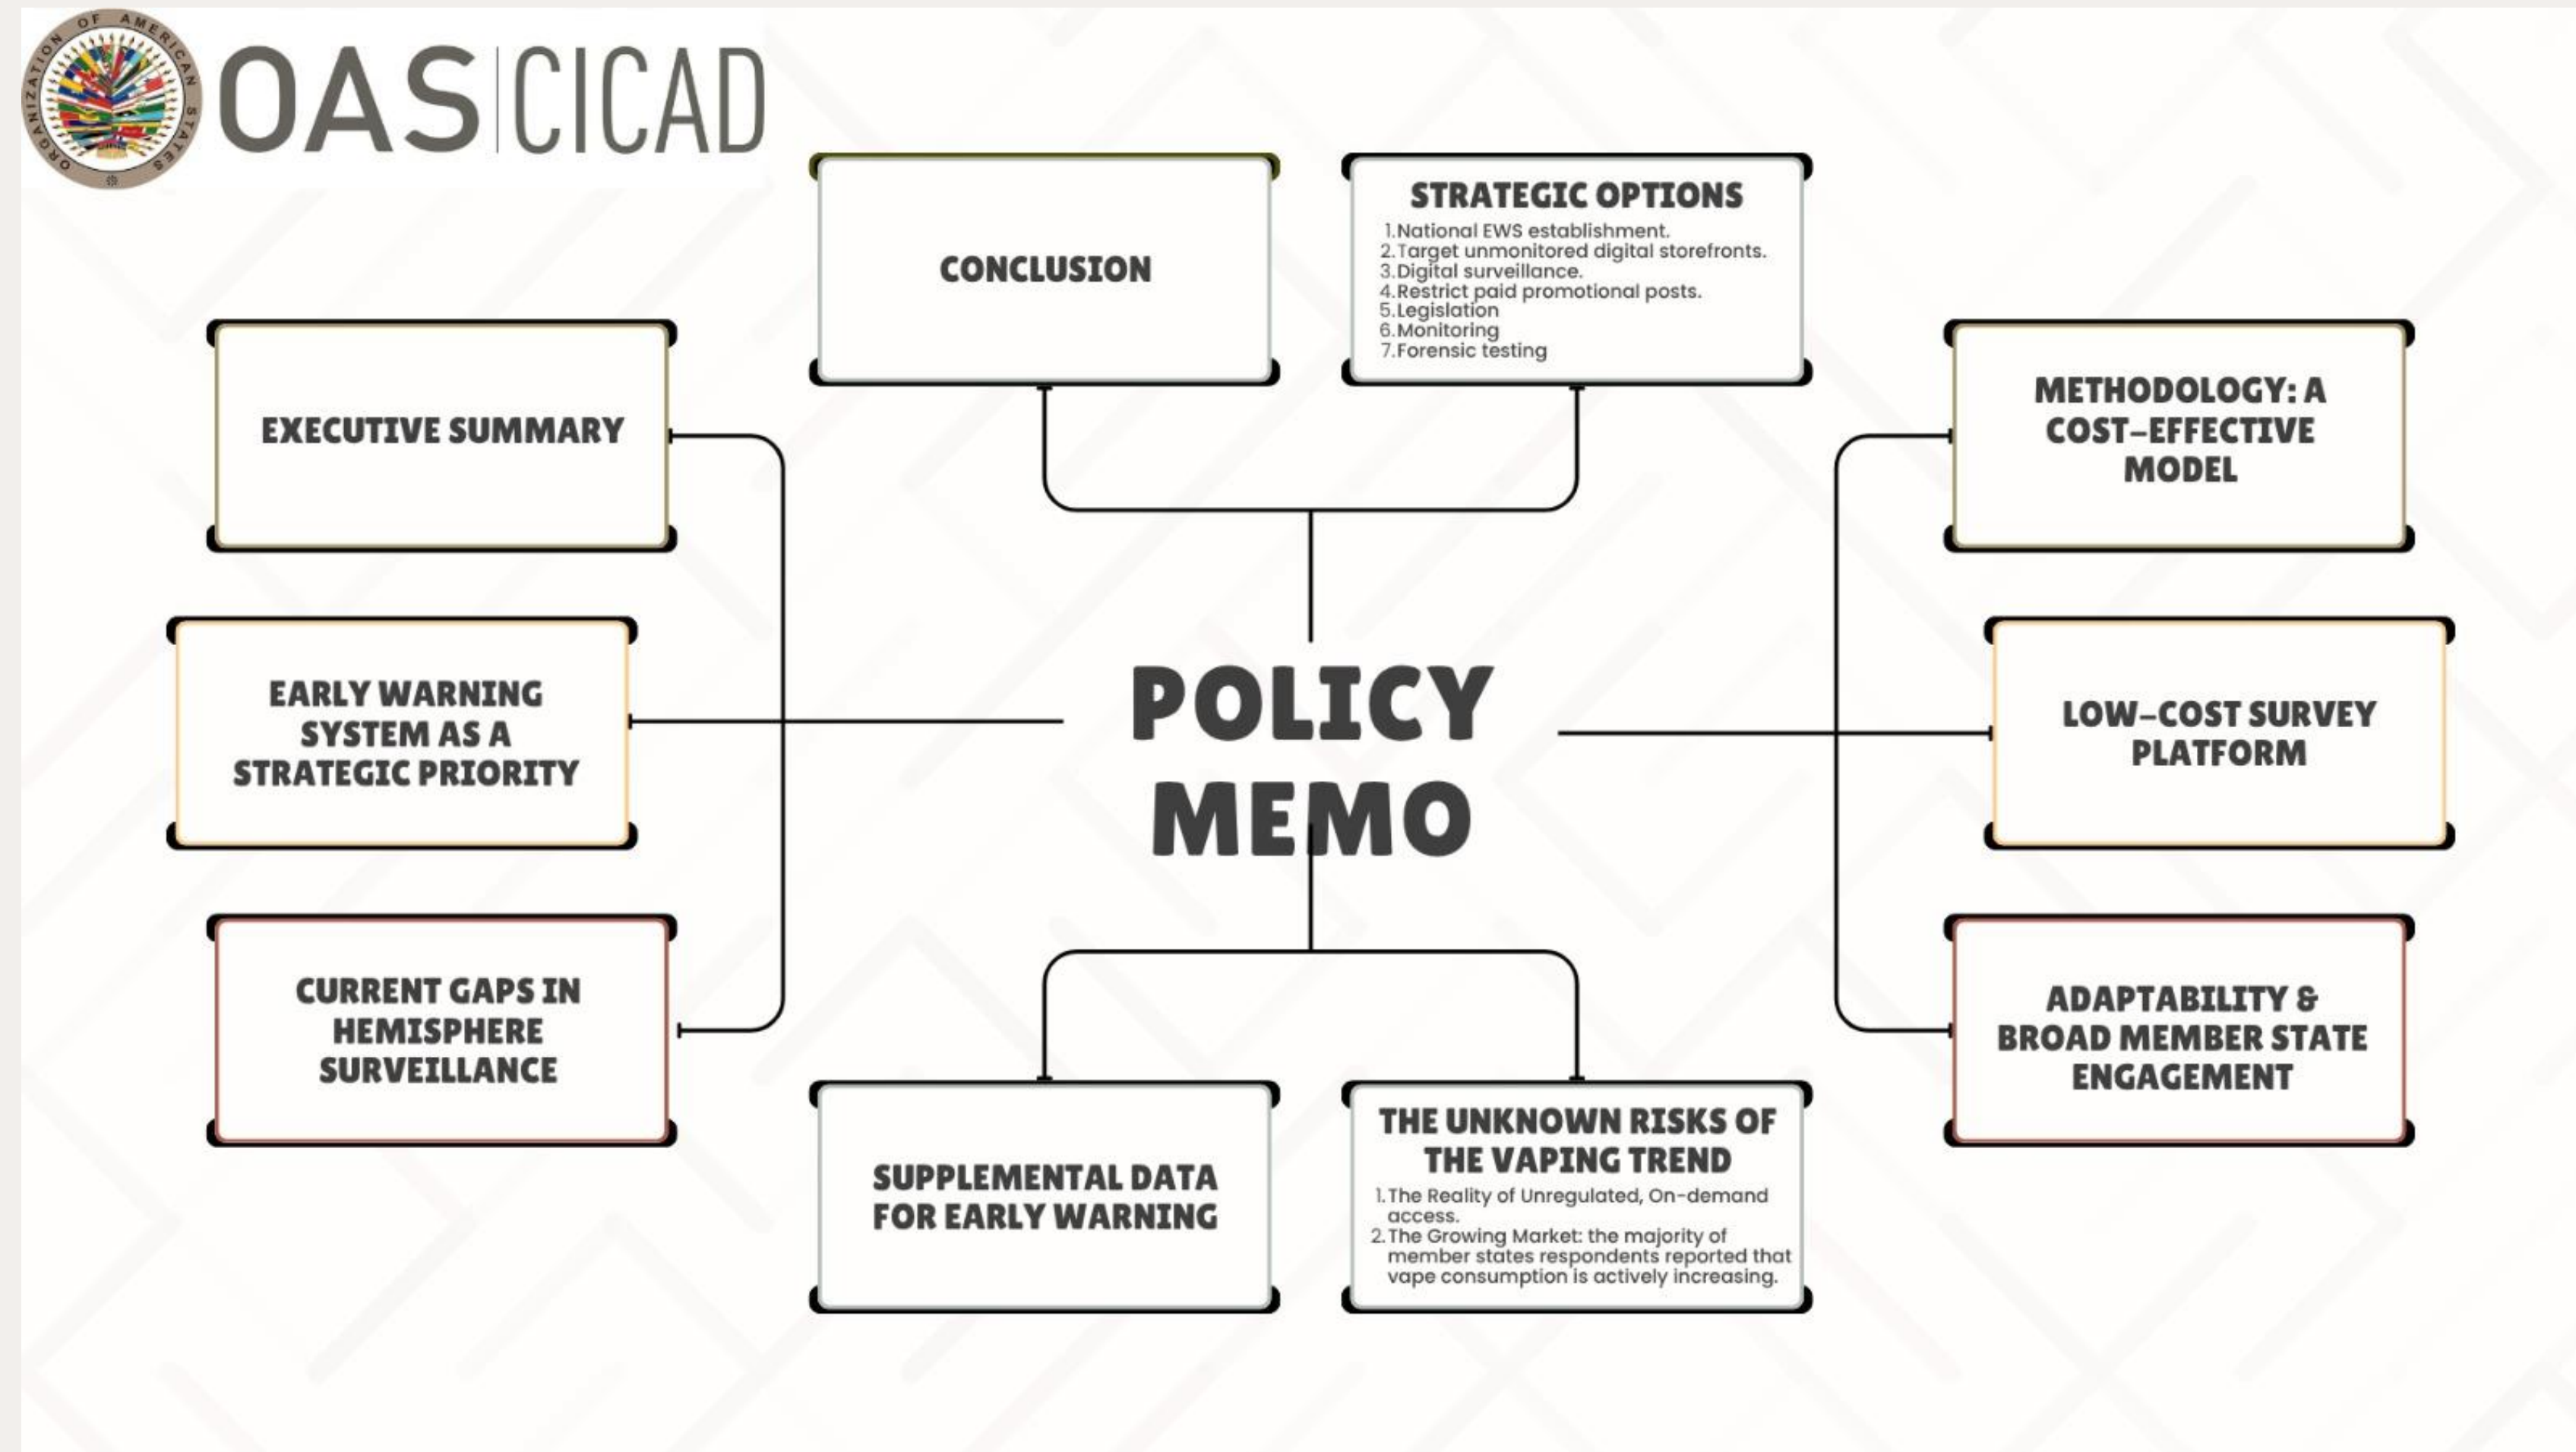

Brief-Questionnaire: E-Cigarettes, vaping, and Drug Use on Survey Monkey

Policy memo

- Drafting an executive policy memo based on questionnaire data to address unmonitored vaping risks and surveillance gaps across the hemisphere.
- Outlining actionable policy options for member states, including web market monitoring, forensic testing, and early warning system (EWS) establishment.
